### **Aluminum Chambered Boats Awarded \$1.2M to Develop a Multi-Mission Armored Watercraft**

*Aluminum Chambered Boat, Inc. (ACB), Bellingham, Washington (November 9, 2007) –* Founder/CEO Larry Wieber and the staff of Aluminum Chambered Boats would like to thank Congressman Rick Larsen and his staff for their support and commitment over the past eighteen months in overseeing the \$1.2M plus-up funds needed to develop a multi-mission armored watercraft. The watercraft will combine advanced electronics for communication with an effective, light-weight armor system which will enhance the safety and communications within joint military operations. The watercraft, by nature of its multi-mission and interoperable capabilities, also affords extensive global commercial and humanitarian applications.

Larry Wieber would like to acknowledge the time, effort, and dedication ACB's president Tim Metz and the ballistics team has put into helping ACB develop a light-weight ballistic system that will support the U.S. military in saving lives all over the world.

In addition to several global military applications, ACB sees significant opportunity in using the light-weight ballistic system to up-armor a number of commercial applications. Larry Wieber states, "ACB has become known as the RAPID RESPONSE company when opportunity is presented. The Board of Directors has unanimously approved forming a wholly owned subsidiary for marketing the many applications of its new ballistic systems."

Again, Larry emphasizes, "due to the dedicated work of Congressman Rick Larsen and his staff the development and testing of this product has been greatly enhanced."

*Aluminum Chambered Boats Inc. is an aluminum boat manufacturer headquartered in Bellingham, Washington. ACB builds patented, rugged, state-of-the-art, high performance aluminum boats for government, recreational, and commercial customers on a global basis.*
